

On June 2nd, I ask that you vote to maintain current ownership rules. It is your responsibility to serve the public interest not private ventures. Our Government is designed to serve the public and protect democracy. I believe the citizens of this great nation still desire to keep it this way. Protect information dissemination from encapsulating only the views of what is most profitable for an owner and / or investor. In my opinion, creating a system to support private media monopolies under the guise of public interest is shameful.
